## 👤 PROFESSIONAL SUMMARY

BCA Fresher and Frontend Developer skilled in building responsive and user-friendly web applications using Angular, React, TypeScript, and Tailwind CSS. Familiar with REST API integration, modern UI/UX practices, and frontend performance optimization. Passionate about developing clean and scalable applications while continuously learning new technologies. Seeking entry-level software developer or frontend developer opportunities.

## 📁 Experience

### Frontend Developer Intern,

KristuJayanti Software Development Centre

06/2025 – 07/2025 | Bengaluru, India

- Developed responsive Angular applications using Tailwind CSS, improving UI responsiveness by ~30% across mobile and desktop devices.
- Integrated REST APIs and optimized data handling for dynamic UI updates.
- Collaborated via GitHub, improving code maintainability and team productivity.

## 🎓 EDUCATION

### Bachelor of Computer Applications (Cloud Computing)

KristuJayanti University, Bengaluru, India

2023 – 2026 | Bengaluru, India

Graduated: July 2026

CGPA: 7.50 / 10

Relevant Courses: OOPS, Operating Systems, DSA, DBMS, Computer Networks, IOT, Edge, Devops, Cloud Computing

### Class XII – Computer Science

St Joseph's Higher Secondary School

2021 – 2023

Percentage: 82.42%

### Class X

St. Mary's Convent School

2020 – 2021

Percentage: 77%

## 🧠 TECHNICAL SKILLS

### Frontend

Angular, React, Tailwind CSS, TypeScript

### Programming

JavaScript, Python, SQL

### Tools

Git, GitHub, Postman, Render, Netlify, Docker, Jenkins, Prometheus, Grafana

### Backend

Node.js, Flask, REST APIs, Django

### Databases

MySQL, MongoDB, SQLite

### CLOUD

AWS EC2, Auto Scaling, ELB

## Projects

### **ZenFit - Fitness Web Application**

- Tech: Angular, Tailwind CSS, REST APIs
  - Built a multi-page responsive application with user authentication and workout modules.
  - Integrated REST APIs to fetch dynamic data
  - Improved user experience with mobile-first UI design.
- GitHub: <https://github.com/jefft007/zenfitgym>

### **Job Application Tracker – Full Stack Web Application**

- Tech: React, Django, SQLite, REST APIs
  - Developed a full-stack job application tracking system using React and Django, enabling users to manage and monitor job applications efficiently.
  - Implemented CRUD operations for adding, updating, deleting, and tracking application statuses such as Applied, Interview, Offer, and Rejected.
  - Built a responsive dashboard with search and filtering features, improving job application organization and user experience.
- GitHub: <https://github.com/jefft007/Job-application-tracker>

### **ResumeAI – AI Powered Resume Analyzer**

- Tech: Angular, Flask, Python, Tailwind CSS, REST APIs
  - Developed a full-stack AI-powered resume analyzer with ATS scoring, skill detection, and job role recommendation features.
  - Integrated PDF resume parsing and AI-based resume rewriting with interview preparation modules.
  - Deployed frontend on [Netlify](#) and backend on [Render](#) with responsive and user-friendly UI design.
- GitHub: <https://github.com/jefft007/resumeai>

### **Server Monitoring Platform – Mobile & Web Monitoring System**

- Tech: Flutter, Prometheus, Grafana, Docker, REST APIs
  - Developed a Flutter-based mobile application to monitor real-time system performance metrics, including CPU, memory, disk, and network usage.
  - Integrated Prometheus APIs for metric collection and configured Grafana dashboards for visualization and analysis of server health.
  - Containerized monitoring services using Docker and implemented auto-refresh dashboards to provide real-time infrastructure monitoring.
- GitHub: <https://github.com/jefft007/system-monitoring-dashboard>

### **CI/CD Pipeline Automation | Jenkins**

- Tech: Jenkins, Docker, GitHub, CI/CD
  - Developed an automated CI/CD pipeline using Jenkins, GitHub, and Docker to streamline application build and deployment workflows.
  - Configured GitHub webhooks and Jenkins pipelines to trigger automated builds, reducing manual deployment effort and improving development efficiency.
  - Built and deployed Dockerized applications through Jenkins, enabling faster and more reliable software releases.
- GitHub: <https://github.com/jefft007/CI-CD-Project>

### **EC2 Deployment with Auto Scaling and Load Balancer**

- Deployed a scalable web application on AWS EC2 instances with Auto Scaling and Load Balancer to ensure high availability and fault tolerance.
- Configured Auto Scaling policies to automatically adjust resources based on traffic demand, improving application reliability and performance.
- Implemented load balancing across multiple EC2 instances, enabling efficient traffic distribution and seamless user access.

## **Certifications**

**AWS Cloud Practitioner Essentials** - Amazon Web Services

**AWS Academy Cloud Foundations** - AWS Academy

**Oracle Cloud Infrastructure Foundations I & II** - Oracle

**Python Foundation** - Infosys Springboard

**Cloud Security Fundamentals** - Palo Alto Networks

**Machine Learning Foundations** - AWS Academy

## **Languages**

- **English** — Professional Proficiency
- **Malayalam** — Native Proficiency
- **Hindi** — Intermediate Proficiency
- **Tamil** — Intermediate Proficiency
