👤 PROFESSIONAL SUMMARY

BCA graduate specializing in Cloud Computing with hands-on experience in software development, full-stack web development, databases, and cloud technologies. Currently working as a Software Development Intern at Dinesh IT Systems, gaining practical experience in backend development, database technologies, and REST APIs. Skilled in Python, Flask, Angular, React, SQL, and AWS, with a strong interest in software development, backend engineering, and cloud computing.

📁 Experience

Software Development Intern(On site)

June 2026 – Sept 2026

Dinesh IT Systems, Kannur, Kerala

- Worked in a three-member development team on a Database Migration Web Application supporting migration between MySQL, PostgreSQL, Oracle, SQLite, and file formats.
- Developed migration modules using Python, Flask, SQL, REST APIs, and database connectors, contributing to data validation, reporting, authentication, and role-based access control.
- Independently developed a Healthcare Management Web Application and its Flutter-based patient mobile application, integrating patient workflows for facility search, doctor selection, token availability, appointment booking, and appointment tracking.
- Used Git and GitHub for version control and followed an Agile development workflow.

Frontend Developer Intern(On site)

June 2025 – July 2025

Kristu Jayanti Software Development Centre

- Developed responsive web applications using Angular and Tailwind CSS, supporting desktop and mobile screen sizes.
- Built ZenFit, a multi-page fitness web application with user authentication and workout-related modules.
- Integrated REST APIs to retrieve and display dynamic application data. Used Git and GitHub for version control and followed software development practices for maintainable code.

🎓 EDUCATION

Bachelor of Computer Applications (Cloud Computing)

2023 – 2026 | Bengaluru, India

Kristu Jayanti College, Bengaluru, India

CGPA: 7.49 / 10

Relevant Courses: OOP, OS, DSA, DBMS, Computer Networks, IoT, Edge, DevOps, Cloud Computing, Java, ML, Cloud Security

Class XII – Computer Science

St. Joseph's Higher Secondary

School 2021 – 2023

Percentage: 82.42%

Class X

St. Mary's Convent School

2020 – 2021

Percentage: 77%

TECHNICAL SKILLS

Programming & Query Languages: Python, C, JavaScript, TypeScript, SQL

Frontend: Angular, React, HTML, CSS, Tailwind CSS, Flutter

Backend: Flask, Node.js, Django, REST APIs

Databases: MySQL, MongoDB, SQLite

Cloud: AWS EC2, Auto Scaling, Elastic Load Balancing (ELB)

Tools & DevOps: Git, GitHub, Postman, Docker, Jenkins, Netlify, Render, Virtual Box

Projects

Healthcare Management System – Web & Flutter Patient App

- Tech: React, Node.js, Express.js, MySQL, Flutter, REST APIs
- Developed a full-stack healthcare management system for managing clinics, doctors, patients, appointments, and token-based consultations.
- Developed a Flutter-based patient mobile application integrated with the backend APIs for searching healthcare facilities, selecting doctors, checking token availability, and booking appointments.
- Implemented role-based workflows for administrators, clinic staff, doctors, and patients with secure authentication and appointment management.
- Integrated the Flutter application with the Node.js/Express backend using REST APIs for real-time patient and appointment data.

GitHub: <https://github.com/jefft007/clinic-management-system>

Database Migration Web Application – Full-Stack Web Application

- Tech: Python, Flask, SQL, MySQL, PostgreSQL, Oracle, SQLite, REST APIs
- Worked in a three-member development team on a database migration web application supporting migration between MySQL, PostgreSQL, Oracle, SQLite, and file formats.
- Implemented migration functionality using Python, Flask, SQL, REST APIs, and database connectors, with support for data validation and reporting.
- Contributed to authentication and role-based access control (RBAC) for secure application access.
- Used Git and GitHub for version control and followed an Agile development workflow.

GitHub: <https://github.com/jefft007/databsemigartor>

ResumeAI – AI-Powered Resume Analyzer

- Tech: Angular, Flask, Python, Tailwind CSS, REST APIs, OpenRouter API
- Developed a full-stack resume analysis application with ATS scoring, skill detection, and job role recommendation features.
- Integrated PDF resume parsing and OpenRouter API to provide AI powered resume rewriting and interview preparation.
- Built a responsive and user-friendly UI and deployed the frontend on Netlify and backend on Render.

GitHub: <https://github.com/jefft007/resumeai>

CI/CD Pipeline Automation – Jenkins

- Tech: Jenkins, Docker, GitHub, CI/CD
- Developed an automated CI/CD pipeline using Jenkins, GitHub, and Docker to streamline application build and deployment workflows.
- Configured GitHub webhooks and Jenkins pipelines to trigger automated builds, reducing manual deployment effort and improving development efficiency.
- Built and deployed Dockerized applications through Jenkins, enabling faster and more reliable software releases.

GitHub: <https://github.com/jefft007/CI-CD-Project>

EC2 Deployment with Auto Scaling and Load Balancer

- Deployed a scalable web application on AWS EC2 instances with Auto Scaling and Load Balancer to ensure high availability and fault tolerance.
- Configured Auto Scaling policies to automatically adjust resources based on traffic demand, improving application reliability and performance.
- Implemented load balancing across multiple EC2 instances, enabling efficient traffic distribution and seamless user access.

Certifications

AWS Cloud Practitioner Essentials - Amazon Web Services

AWS Academy Cloud Foundations - AWS Academy

Oracle Cloud Infrastructure Foundations I & II - Oracle

Python Foundation - Infosys Springboard

Cloud Security Fundamentals - Palo Alto Networks

Machine Learning Foundations - AWS Academy

Languages

- **English** - Professional Proficiency
- **Malayalam** — Native Proficiency
- **Hindi** — Intermediate Proficiency
- **Tamil** — Intermediate Proficiency
